Lottie Hooyer
IDOA Senior Account Manager for FSSA & DCS
Indiana Government Center South
402 W. Washington St., Room W461
Indianapolis, IN 46204

1. Responses to written questions are being posted with this addendum

2. RFS Section 1.4 Summary Scope of Work has been updated to remove references to IV&V and Quality Assurance (QA) services.

Respondents should ignore any references to IV&V and QA services. All other requirements remain unchanged.

Section 1.4 now reads as follows:

1.4 SUMMARY SCOPE OF WORK

The State is soliciting a Contractor(s) to provide consulting services to assist the State by reviewing its existing MMIS and making recommendations for upgrade or replacement, reviewing business practices, processes, and procedures that impact the MMIS, developing business and technology needs to help the State meet its goals, **and** writing a subsequent RFS to procure a contractor to design, develop, and implement a new MMIS, ~~and providing Independent Validation and Verification and Quality Assurance services on the new MMIS~~ as described in detail in the Scope of Work (Attachment D).

3. Section references have been updated in Attachment D and Attachment G, in response to questions requesting clarification.

4. The Cost Proposal (Attachment H) has been updated to reflect assumptions for the purposes of calculating Respondents' price proposal. Respondents should assume an RFI will be required, and only one RFS will be needed for the MMIS Replacement effort. Space has now been provided in the Phase 2 pricing tab for Respondents to indicate how the price will be adjusted should an RFI not be needed, or should more than one RFS be needed.

5. A new document has been added to the Bidder's Library. Attachment E.5 provides information on the MSIS Process, as requested by Respondents.
